

ASHVOLT ($AVLT)

PROJECT WHITEPAPER | OCTOBER 2026 | PRE-LAUNCH EDITION

1. Executive summary

ASHVOLT is a Halloween-inspired meme coin concept built around a lovable pumpkin character, his friendly ghost companion Ghostie, and a growing world of playful stories, music and community creativity. The project is intended as an entertaining, welcoming creative initiative, not as a product promising financial returns.

2. The ASHVOLT world

The project begins with two recognizable characters: ASHVOLT, an expressive pumpkin with a playful personality, and Ghostie, his cheerful companion. Their adventures provide a flexible foundation for animated shorts, musical moments, seasonal storytelling, memes and community-created ideas.

Already created

- A recognizable Halloween visual identity for ASHVOLT and Ghostie.
- The ASHVOLT Halloween Adventure musical film as an early creative showcase.
- A Pump.fun creator profile prepared for project updates and launch visibility.

3. Vision and guiding principles

- Creativity first: develop enjoyable character-led stories, music and seasonal content.
- Community participation: welcome suggestions, fan art and constructive feedback.
- Transparency: separate completed work from ideas and planned milestones.
- Responsible participation: make no claims of guaranteed profits, prices or outcomes.

4. The token and launch approach

The planned token name is ASHVOLT and the planned ticker is AVLT. The intended launch venue is Pump.fun on Solana, subject to a final review of platform requirements, wallet setup, costs and project details. At the time of this pre-launch edition, the project does not assert that a token has been deployed.

Token details requiring verification

- Official contract / mint address: not available until deployment.
- Token supply, decimals, creator holdings and any distribution details: to be verified from the actual launch configuration and on-chain records.
- Liquidity, trading conditions, fees and platform mechanics: subject to current Pump.fun rules and actual on-chain conditions.
- No staking, yield, revenue-sharing, buyback, burn program or holder entitlement is promised in this document.

5. Launch preparation

- Confirm the token name, ticker, final artwork, description and linked official channels.
- Verify the connected wallet, network, SOL balance and transaction costs before submitting.
- Review creator reward / fee settings and whether a designated receiving wallet can be used.
- Publish the verified contract address only after deployment and warn against impersonators.

6. Creator rewards and marketing

The project intends to evaluate promotion and creative production using resources that are genuinely available. Any creator rewards will be considered only if actually received; no reward income is assumed or guaranteed. The project intends to communicate transparently about how any such funds are used, including potential marketing activities. This is an intention, not a promise of a particular budget or outcome.

7. Development roadmap

The six phases below summarize the accompanying ASHVOLT Community Roadmap. They are flexible development intentions, not guaranteed deadlines or deliverables.

Phase 01 — The Spark: Creative Foundation

Introduce ASHVOLT and Ghostie, establish the visual identity and create the first musical Halloween adventure. Status: core characters and first film created; communication materials remain under review.

Phase 02 — The Launch: Going Live

Complete final checks, review wallet and platform settings, launch when ready and publish a verified token address. Status: planned.

Phase 03 — First Community Momentum

Share the film, publish short clips and character content, encourage respectful participation and gather feedback.

Phase 04 — Stories, Music & Seasonal Magic

Explore further mini-adventures, music-led animations, new settings and holiday-themed episodes when resources allow.

Phase 05 — Community Participation

Consider fan art, memes, polls, creative challenges and regular project updates, with permission and attribution for community contributions.

Phase 06 — Sustainable Development

Review which creative activities and collaborations are realistic given time, funding and community priorities; adapt plans openly as circumstances change.

8. Beyond Halloween

A wider animated ASHVOLT universe, seasonal specials, themed music and creator collaborations may be explored. These are possibilities, not confirmed commitments. The creative direction will be evaluated over time.

9. Community and communications

The project aims to provide clear updates, invite constructive suggestions and maintain a respectful environment. Official channels should be checked before relying on announcements or token addresses. Community participation is voluntary, and no individual is required to buy a token to enjoy the characters or creative content.

10. Key risks and limitations

- Market risk: meme coins are speculative and can lose all their value.
- Liquidity and execution risk: the ability to buy or sell at an expected price is not assured.
- Platform and technical risk: wallets, networks, smart contracts and third-party platforms can experience faults, changing rules or security incidents.
- Project delivery risk: creative work and roadmap milestones depend on time, resources and participation; plans may be delayed, changed or discontinued.
- Scam risk: impersonation and fraudulent token addresses are possible. Verify announcements independently.

11. No investment promises

ASHVOLT ($AVLT) is described as a speculative meme coin concept and creative community initiative. This whitepaper is informational and does not constitute financial advice, an offer of guaranteed returns or a commitment to any market performance. There are no guarantees of price appreciation, profitability, liquidity, exchange listings, community growth or completion of future milestones. Readers should conduct independent research and participate only within their own risk tolerance.

12. Document status

This is a pre-launch project whitepaper dated October 2026. It reflects current creative intentions and the accompanying roadmap. Any future update should identify material changes, including confirmed token details after launch. It does not claim independent auditing, legal review or technical verification.

ASHVOLT — A little pumpkin. A big imagination.
